OC-M-74-149
15 March 1974

MEMORANDUM FOR: Deputy Director for Management and Services
SUBJECT : Weekly Report

25X1C

25X1A
25X1A

2. [REDACTED] The shielded enclosure installation team has finally arrived [REDACTED] after ten months of planning and waiting. The job should be complete by 18 March 1974.

3. The Project Terminal Facility on the 6th floor has been closed and the equipment removed to make room for the DATEX switch. All PTF circuitry is now terminated in the main Signal Center.

4. ADP Resource Allocations: As of 31 January 1974, OC had used only 30 percent of the year's allocation. This is largely due to the inability of OJCS to allocate resources to OC MAP requirements. It appears that this situation will obtain through the remainder of the year. If this situation continues at least 40 percent of time sharing and 25 percent of manpower and batch processing resources allocated to OC for FY-1974 can be released if necessary.

Planned Activities

25X1C

25X1C

25X1A

1. SKYLINK: Continuous operational availability of the [REDACTED] satellites is expected on 18 March 1974. The first 48 hours of operation will be devoted to "burn-in" testing prior to going into traffic mode. In the interim [REDACTED] is making the system available [REDACTED] eight hours each day. This time is being used for system testing and alignment to ensure that installed terminals are ready for operation.

2. Automated Relay Station (ARS): Operational training on the ARS is scheduled for 15-22 April in preparation for planned system operational availability in July of this year.
